

# Fourth Sunday in Ordinary Time January 29, 2012

We are the flock,  
the Lord guides.

## Gospel Summary

Much of Jesus' teaching took place in a synagogue and specifically in today's reading, the synagogue at Capernaum was filled with Jewish people from Galilee. Jesus' listeners were surprised by his knowledge and authority. He especially surprised them when he cast out an evil spirit from one of the men. The evil spirit recognized who Jesus was and called him "the Holy One of God." The people didn't understand this meaning. Only the evil spirit recognized Jesus. The people, however, were impressed by Jesus' deeds and brought others to him for healing.

## Reflection for Families

It is an awesome responsibility to have authority over another person. Our very use of that authority has the potential of lifting people up or tearing them down. The greatest responsibility we have rests in the authority we have over our children. The words we choose, the tone of voice we use to speak to them and the actions our children see us take, relate to them the authority Jesus has over us. It's often a sobering experience to think back over the day and recall what kind of witness we've been for Jesus. Our hope is that we can try again tomorrow.

## Bringing the Gospel Into Your Family

We may not be able to exorcise evil spirits, but as a family, suggest places in your school, work place, neighborhood or community where evil (or something unjust) exists. Make a plan and take an action as a family to right this wrong.

## Discussion Starters

1. Just like Jesus sent the evil spirit from the man, someone once helped me get over something troubling when...
2. People were looking to Jesus to perform healings and miracles. A miracle I witnessed was when...
3. One person of great authority who I think is most like Jesus is...

The potential benefits of adult stem cell research are very considerable, since it opens up possibilities for healing chronic degenerative illnesses by repairing damaged tissue and restoring its capacity for regeneration. The improvement that such therapies promise would constitute a significant step forward in medical science, bringing fresh hope to sufferers and their families alike. For this reason, the Church naturally offers her encouragement to those who are engaged in conducting and supporting research of this kind, always with the proviso that it be carried out with due regard for the integral good of the human person and the common good of society.
